

RENTAL MARKET REPORT

Ottawa-Gatineau CMA (Ontario)

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Fall 2012

Highlights

- Ottawa's apartment vacancy rate climbed to 2.5 per cent in 2012 up from 1.4 per cent in 2011.
- The average fixed sample rent for two bedroom apartments increased by 2.0 per cent in 2012. Next year, expect a higher rate of growth of 2.7 per cent.
- Strong migration remains the main driver expected to tighten rental market conditions further in 2013 pushing the vacancy rate down to 2 per cent.

Market Overview

The rental market survey conducted in October 2012 by Canada Mortgage and Housing Corporation (CMHC) revealed that the average vacancy rate for the Ottawa Census Metropolitan Area (CMA) increased to 2.5 per cent up from 1.4 per cent in 2011. Consequently, Ottawa slid to seventh lowest vacancy rate in the province from third place last year.

A number of demand and supply factors worked in tandem to put upward pressure on the vacancy rate this year. On the demand side, historically low borrowing costs led some first-time homebuyers to jump into the homeownership market. Likewise, weaker employment in the 15-24 age cohort induced young adults to remain at home longer. Together these factors led to the reduction in rental market demand, diminishing the positive effects of robust immigration levels on demand.

On the supply side, a larger number of rental units offered in the secondary market saw the number of households choosing such accommodations rise significantly over last year's levels. Furthermore, the expansion of condominium units bought by investors to rent them out as income properties also aided in pressuring the vacancy rate of purpose-built units upward. Jointly, secondary market structures and condominium rentals have provided renters more options than purpose-built rental units have.

Demand Factors

Modest but supportive employment growth

Employment of the 25-44 age cohort inched higher in seasonally adjusted

terms since August supporting homeownership demand. This is the age group more likely to be making the choice between renting and owning. The second quarter uptick in home sales had put upward pressure on vacancy rates as renters moved out of their rented accommodations and into their new homes. Indeed, signalling that the movement from rental to ownership remained fairly robust was Ottawa's availability rate that rose to 4.6 per cent from 3.1 last October.

Further easing in rental demand came from the weaker employment performance of the 15-24 age cohort, which edged lower over the second half of the year. In recent years, the youth have been increasingly choosing to stay home longer, and thereby demanding less rental accommodations. According to the most recent census for Ottawa, 64 per cent of young adults aged 18-24 were living at home. While the figure is down from 66 per cent in Census 2006, it remains significant.

Healthy but slowing net migration

The continued attraction of Canada's capital to immigrants supported rental demand. Research shows that immigrants are more likely to rent in the first four years since migration. Albeit moderating from the 2011 numbers, immigration has remained at a healthy level in Ottawa.

In 2011, net migration totalled over 10,600 and although it is expected to fall slightly in 2012 and in 2013, it will remain significantly higher than the average for the last 10 years of 6,000 persons. While immigration remained one of the main factors supporting demand for rental accommodations in

the Ottawa CMA, increased numbers of rental accommodations outweighed the vigorous demand and pushed the vacancy rate upwards.

Supply Factors

Ample supply of secondary rental market units

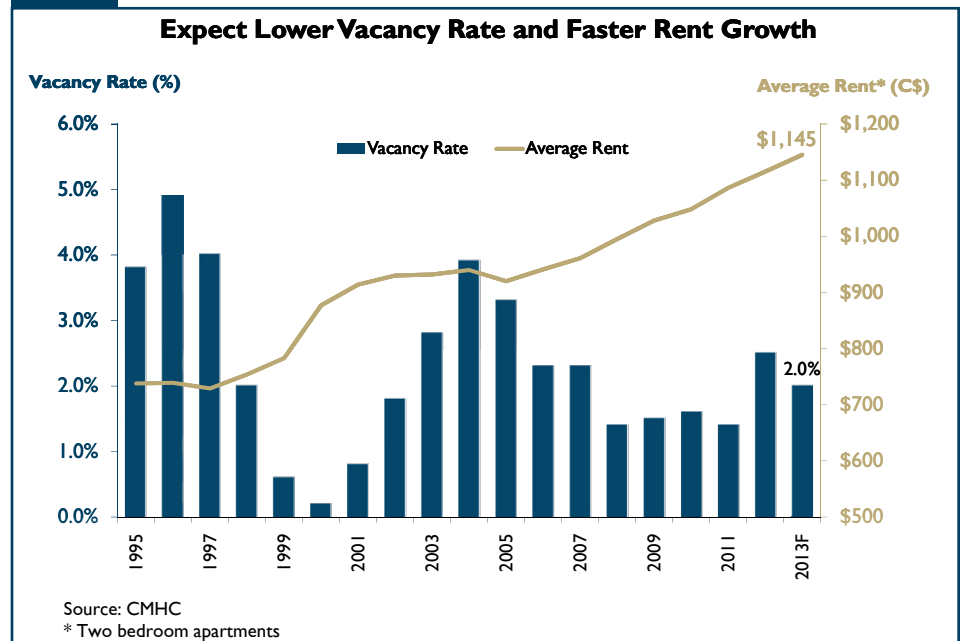

Although the purpose-built rental market supply remained relatively stable, the increased supply of almost 4,000 more rental units to the secondary rental market provided renters with more choices. As the secondary market occupancy level rose 11.4 per cent year-over-year, its share increased to over one third of the total rental supply in the Ottawa CMA. Worthy of note is that the average rent for the 2-bedroom semi-detached, row and duplex units recorded a 7.5 per cent decline over 2011 levels, encouraging some renters to opt for such dwelling types.

Over one-fifth of condominiums are rentals

The share of condominium units offered for rental purposes broke the 20 per cent threshold this year. Investors are recognizing the market potential presented by young professionals who may be on the fence and considering either buying their first home or renting a newer more modern condo. The average rent of a two-bedroom condominium unit is almost 15 per cent higher relative to the average rent of a two-bedroom rental purpose unit, supporting investor demand.

Furthermore, new condominium rentals offer existing renters more choice at the higher end of the market. As a result, primary rental-market occupancy rates at higher rent ranges fell this fall resulting in a more pronounced jump in vacancy rates at the higher end from this time last year. One- and two-bedroom units renting

Figure 2

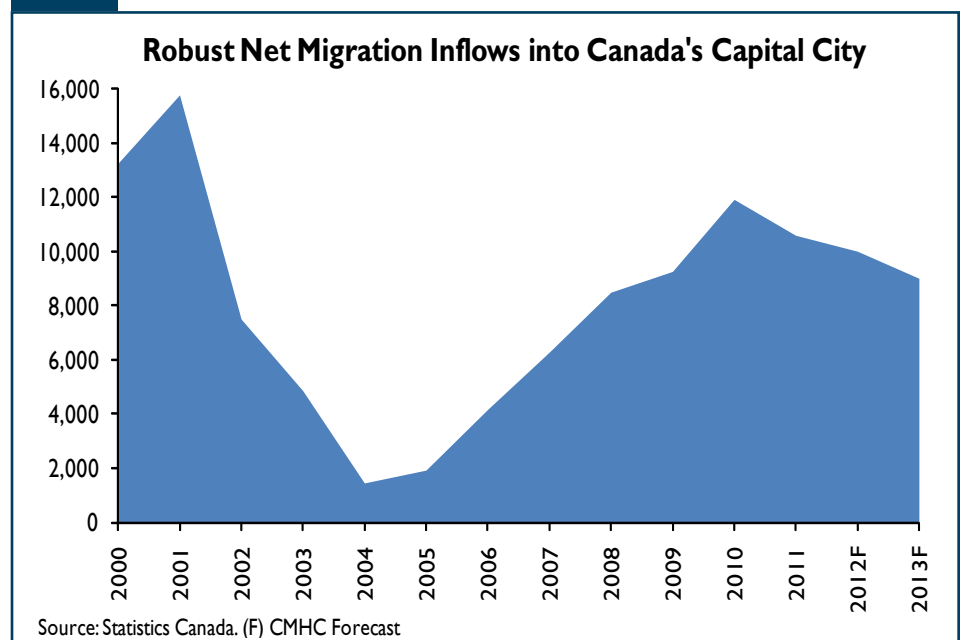

at the most expensive portion of the market recorded the highest vacancy rates this year at 4.2 and 3.9 per cent, respectively, over double the vacancy rates observed of equal-sized and similarly priced units last year.

Supply of purpose-built units also expanded

The year saw the completion of 439 purpose-built rental apartment units, over three times as many as those completed in either 2011 or 2010, and the largest number of apartments added to market supply in a single year since 2004. However,

Figure 3

163 units out of the total were social housing units and the remaining apartments were mostly high-end units mainly located in suburban areas possibly geared toward downsizing older households. Consequently, the increased supply of completed purpose-built rental units may not have contributed much to the upward pressure on vacancy rates.

Ottawa's rent rises below guideline

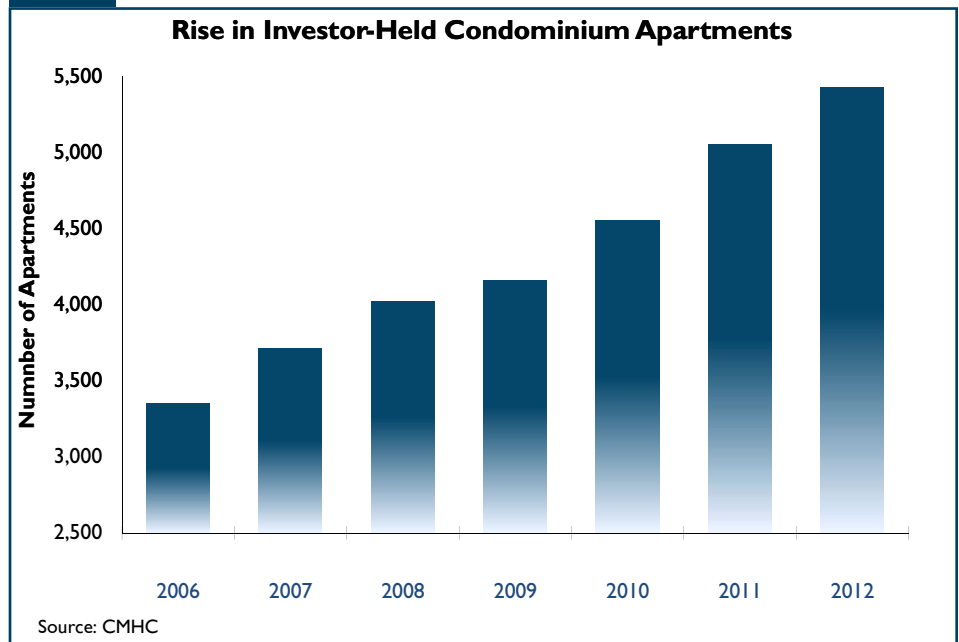

The 2-bedroom fixed sample rent rose 2.0 per cent, decelerating from the 2.3 per cent growth seen in 2011 and remained below the Rent Guideline of 3.1 per cent for 2012 in Ontario. The largest fixed sample rent increase was observed among bachelor units, especially among those located in Vanier, Chinatown/Hintonbug/Westboro North, Alta Vista and Hunt Club/South Keys.

Given an environment with increasing supply in a time when many were leaving the rental market to buy a home, this dampened the rate of growth in rents versus the previous year. In order to attract tenants looking for rental accommodations, rent for a 2-bedroom apartment increased at a slower rate than the previous year. Also, with landlords less able to fill available units, asking and final rents on newly occupied units grew at a rate below the allowable guideline amount.

2013 Rental Market Outlook

Going forward, vacancy rates are expected to trend downward towards 2 per cent. The expected rise in home prices may delay the homeownership decision of some on-the-fence first-time homebuyers who may choose to

Figure 4

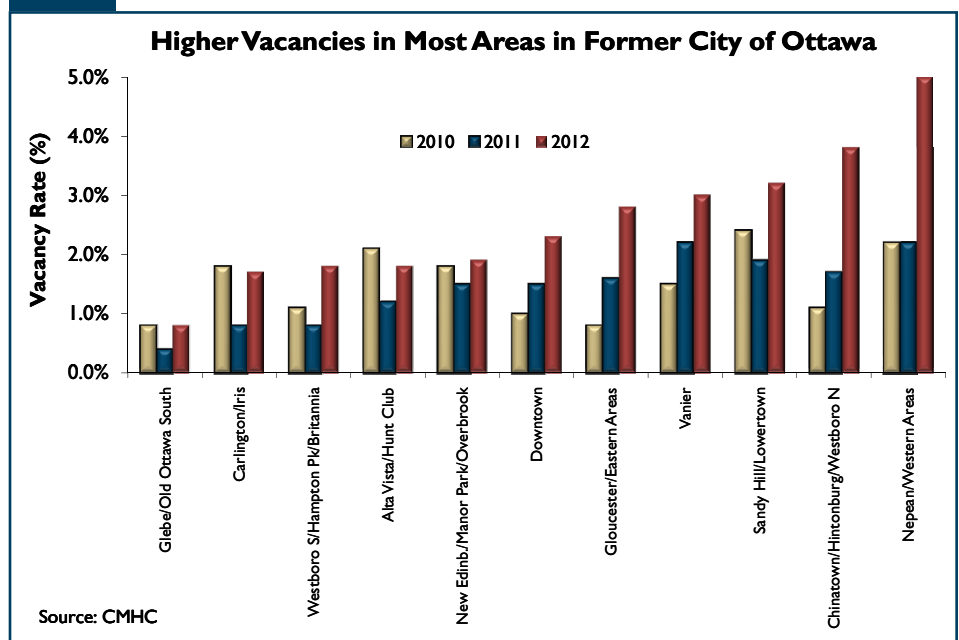

continue to rent over the immediate term thereby pressuring vacancy rates down.

Both new and resale home prices are expected to increase at a slower pace. However, with employment and income gains expected to remain modest in 2013, potential buyers may delay the purchase of big-ticket items, including homes, supporting

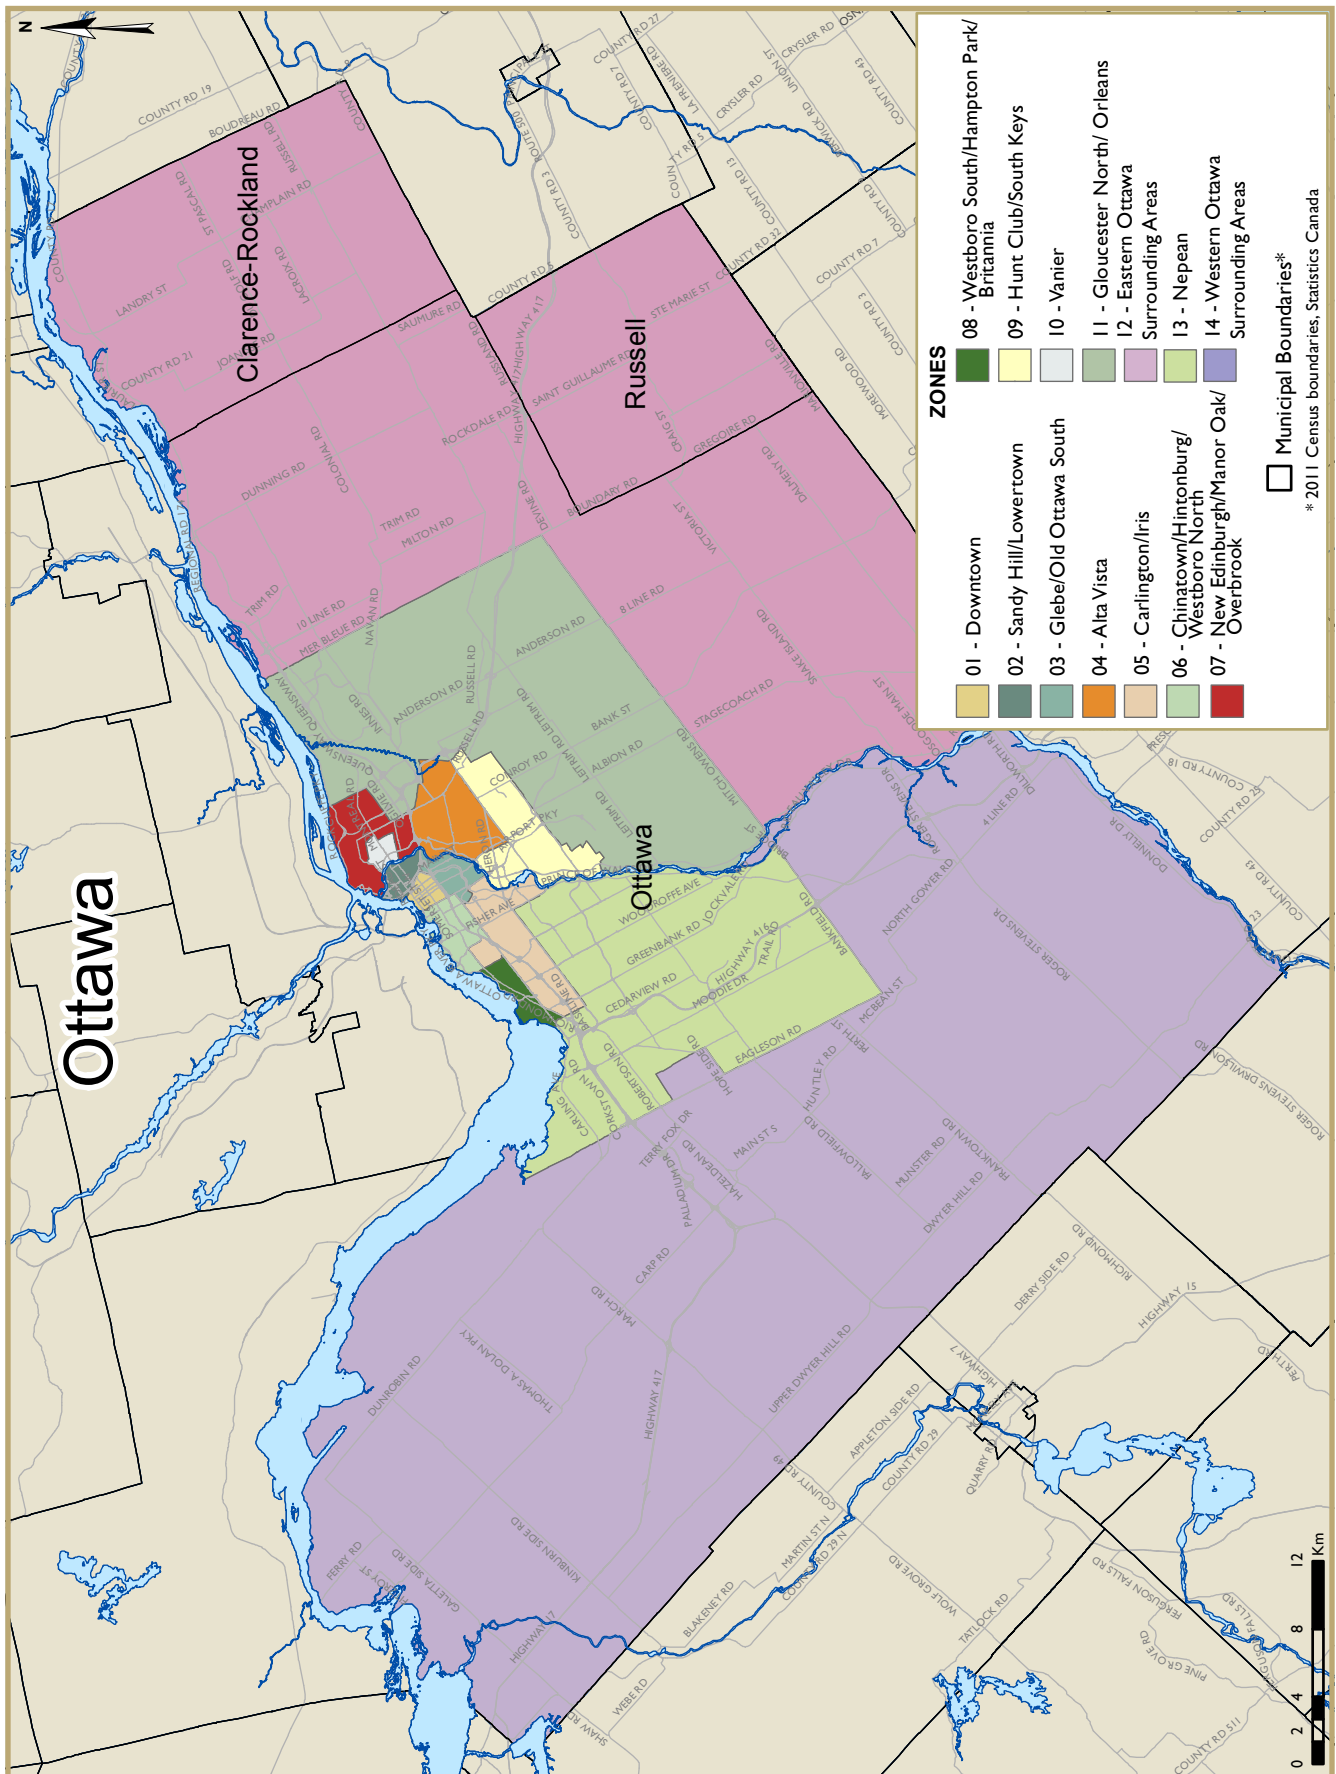

rental demand. Moreover, continued positive migration inflows will exert downward pressure on vacancy rates.

The main sources of rental supply, namely purpose built rental accommodations and the secondary market, are expected to remain stable. New rental supply will continue flowing from the condominium apartment market but will not be

Figure 5

sufficient enough to satisfy the increasing rental demand. As the rental market tightens once more, the market will absorb increases in rents at a slightly higher pace than the 2.5 per cent ceiling.

RMS ZONE DESCRIPTIONS - OTTAWA-GATINEAU CMA (ONTARIO PORTION)	
Zone 1	Downtown - Bounded by Queensway (south), Bronson (west), Ottawa River (north), Rideau Canal (east).
Zone 2	Sandy Hill/Lowertown - Includes Sandy Hill and Lowertown.
Zone 3	Glebe/Old Ottawa South -Includes the Glebe and Old Ottawa South.
Zone 4	Alta Vista - Includes Alta Vista
Zone 5	Carlington/Iris - Includes the area south of Carling Ave., west of Bronson and the Rideau River and north of Beatrice (Carlington and Iris).
Zone 6	Chinatown/Hintonburg/Westboro North - Includes Chinatown, Hintonburg and Westboro north of Richmond Rd.
Zone 7	New Edinburgh/Manor Park/Overbrook - Includes New Edinburgh, Manor Park and Overbrook.
Zone 8	Westboro South/Hampton Park/Britannia - Includes Westboro South, Hampton Park and Britannia.
Zone 9	Hunt Club/South Keys - Includes Hunt Club and South Keys
Zones 1-9	Former City of Ottawa
Zone 10	Vanier - Includes Vanier.
Zone 11	Gloucester North/Orleans - Includes the former municipality of Gloucester.
Zone 12	Eastern Ottawa Surrounding Areas - Includes the former municipalities of Cumberland, Clarence-Rockland, Russell and Osgoode.
Zones 11-12	Gloucester and Eastern Areas
Zone 13	Nepean - Includes the former municipality of Nepean.
Zone 14	Western Ottawa Surrounding Areas - Includes the former municipalities of Kanata, West Carleton, Goulbourn and Rideau.
Zones 13-14	Nepean and Western Areas
Zones 1-14	Ottawa-Gatineau CMA (Ontario portion)

CONDOMINIUM SUB AREA DESCRIPTIONS - OTTAWA-GATINEAU CMA (ONTARIO PORTION)	
Sub Area 1	Downtown includes RMS Zone 1 (Downtown); Zone 2 (Sandy Hill/Lowertown); and Zone 3 (Glebe/Old Ottawa South).
Sub Area 2	Inner Suburbs includes RMS Zone 4 (Alta Vista); Zone 6 (Chinatown/Hintonburg/Westboro North); Zone 7 (New Edinburgh/Manor Park/Overbrook); Zone 8 (Westboro South/Hampton Park/Britannia); and Zone 10 (Vanier).
Sub Area 3	Outer Suburbs includes RMS Zone 5 (Carlington/Iris); Zone 9 (Hunt Club/South Keys); Zone 11 (Gloucester North/Orleans); Zone 12 (Eastern Ottawa Surrounding Areas); Zone 13 (Nepean); Zone 14 (Western Ottawa Surrounding Areas).

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b - Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b- Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

TECHNICAL NOTE:

Difference between Percentage Change of Average Rents (Existing and New Structures) AND Percentage Change of Average Rents from Fixed Sample (Existing Structures Only):

Percentage Change of Average Rents (New and Existing Structures): The increase/decrease obtained from the calculation of percentage change of average rents between two years (example: \$500 in the previous year vs. \$550 in current survey represents an increase of 10 percent) is impacted by changes in the composition of the rental universe (e.g. the inclusion of newly built luxury rental buildings in the survey, rental units renovated/upgraded or changing tenants could put upward pressure on average rents in comparison to the previous year) as well as by the rent level movement (e.g. increase/decrease in the level of rents that landlords charge their tenants).

Percentage Change of Average Rents from Fixed Sample (Existing Structures Only): This is a measure that estimates the rent level movement. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. However, some composition effects still remain e.g. rental units renovated/upgraded or changing tenants because the survey does not collect data to such level of details.

METHODOLOGY FOR RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts the **Rental Market Survey (RMS)** every year in April and October to estimate the relative strengths in the rental market. The survey is conducted on a sample basis in all urban areas with populations of 10,000 and more. The survey targets only privately initiated structures with at least three rental units, which have been on the market for at least three months. The survey collects market rent, available and vacant unit data for all sampled structures.

The survey is conducted by a combination of telephone interviews and site visits, and information is obtained from the owner, manager, or building superintendent. The survey is conducted during the first two weeks of April/October, and the results reflect market conditions at that time.

CMHC's Rental Market Survey provides a snapshot of vacancy and availability rates, and average rents in both new and existing structures. There also exists a measure for the change in rent that is calculated based on existing structures only. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. The change in rent in existing structures is an estimate of the change in rent that the landlords charge and removes compositional effects on the rent level movement due to new buildings, conversions, and survey sample rotation. The estimate of per cent change in rent is available in all Canada and Provincial Highlights publications, and also in the CMA reports (fall survey only). The rent levels in new and existing structures are also published. While the per cent change in rents in existing structures published in the reports are statistically significant, changes in rents that one might calculate based on rent levels in new and existing structures may or may not be statistically significant.

METHODOLOGY FOR SECONDARY RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts a survey of the **Secondary Rental Market (SRMS)** in September and October to estimate the relative strengths in the secondary rental market which is defined as those dwellings not covered by the regular RMS. CMHC has identified the following dwelling components to be included in SRMS:

- Rented single-detached houses.
- Rented double (semi-detached) houses (i.e.. Two units of approximate equal size and under one roof that are situated either side-by-side or front-to-back).
- Rented freehold row/town homes.
- Rented duplex apartments (i.e.. one-above-other).
- Rented accessory apartments (separate dwelling units that are located within the structure of another dwelling type).
- Rented condominiums (can be any dwelling type but are primarily apartments).
- One or two apartments which are part of a commercial or other type of structure.

The SRMS has three components which are conducted in selected CMAs:

- A Household Rent Survey of all households to collect information about rents.
- A Condominium Apartment Rent Survey of households living in condominium apartments to collect information about rents.
- A Condominium Apartment Vacancy Survey of condominium apartment owners to collect vacancy information.

All three surveys are conducted by telephone interviews. For the condominium apartment vacancy survey, information is obtained from the owner, manager, or building superintendent and can be supplemented by site visits if no telephone contact is made. For the other two surveys, information is collected from an adult living in the household. All surveys are conducted in September and October, and the results reflect market conditions at that time.

CMHC publishes the number of units rented and vacancy rates for the condominium vacancy survey. For the condominium rent and household rent surveys, the average rent is published. A letter code representing the statistical reliability (i.e., the coefficient of variation (CV)) for each estimate is provided to indicate the data reliability. Rented condominium apartments were surveyed in the following CMAs: Vancouver, Victoria, Calgary, Edmonton, Regina, Saskatoon, Winnipeg, Toronto, Ottawa, Montréal and Québec (NOTE: Condo rent data was not collected for Regina and Saskatoon). Other secondary rental market units were surveyed in Abbotsford, Barrie, Calgary, Edmonton, Halifax, Montreal, Ottawa, Quebec, St. John's, Toronto, Winnipeg, Regina, Saskatoon, Kelowna, Vancouver and Victoria.

Every year CMHC reviews the method of estimation for Household Rent Survey, which may result in some changes to previously published estimates. All statistics in this report are reflective of the new method of estimation.

DEFINITIONS

Availability: A rental unit is considered available if the existing tenant has given, or has received, notice to move, and a new tenant has not signed a lease; or the unit is vacant (see definition of vacancy below).

Rent: The rent refers to the actual amount tenants pay for their unit. No adjustments are made for the inclusion or exclusion of amenities and services such as heat, hydro, parking, and hot water. For available and vacant units, the rent is the amount the owner is asking for the unit.

It should be noted that the average rents reported in this publication provide a sound indication of the amounts paid by unit size and geographical sector. Utilities such as heating, electricity and hot water may or may not be included in the rent.

Rental Apartment Structure: Any building containing three or more rental units, of which at least one unit is not ground oriented. Owner-occupied units are not included in the rental building unit count.

Rental Row (Townhouse) Structure: Any building containing three or more rental units, all of which are ground oriented with vertical divisions. Owner-occupied units are not included in the rental building unit count. These row units in some centres are commonly referred to as townhouses.

Vacancy: A unit is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Definitions of Census Areas referred to in this publication are as follows:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

October 2011 data presented is based on Statistics Canada's 2006 Census area definitions. October 2012 data presented is based on Statistics Canada's 2011 Census area definitions.

Acknowledgement

The Rental Market Survey and the Secondary Rental Market Survey could not have been conducted without the cooperation of the rental property owners, managers, building superintendents and household members throughout Canada. CMHC acknowledges their hard work and assistance in providing timely and accurate information. As a result of their contribution, CMHC is able to provide information that benefits the entire housing industry.

Rental Affordability Indicators

CMHC no longer reports on its rental affordability indicators (i.e. average rent compared to average renter income) given significant variability of underlying renter income data.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.

CMHC grants reasonable rights of use of this publication's content solely for personal, corporate or public policy research, and educational purposes. This permission consists of the right to use the content for general reference purposes in written analyses and in the reporting of results, conclusions, and forecasts including the citation of limited amounts of supporting data extracted from this publication. Reasonable and limited rights of use are also permitted in commercial publications subject to the above criteria, and CMHC's right to request that such use be discontinued for any reason.

Any use of the publication's content must include the source of the information, including statistical data, acknowledged as follows:

Source: CMHC (or "Adapted from CMHC," if appropriate), name of product, year and date of publication issue.

Other than as outlined above, the content of the publication cannot be reproduced or transmitted to any person or, if acquired by an organization, to users outside the organization. Placing the publication, in whole or part, on a website accessible to the public or on any website accessible to persons not directly employed by the organization is not permitted. To use the content of any CMHC Market Analysis publication for any purpose other than the general reference purposes set out above or to request permission to reproduce large portions of, or entire CMHC Market Analysis publications, please contact: the Canadian Housing Information Centre (CHIC) at chic@cmhc.ca; 613-748-2367 or 1-800-668-2642.

For permission, please provide CHIC with the following information:
Publication's name, year and date of issue.

Without limiting the generality of the foregoing, no portion of the content may be translated from English or French into any other language without the prior written permission of Canada Mortgage and Housing Corporation.

The information, analyses and opinions contained in this publication are based on various sources believed to be reliable, but their accuracy cannot be guaranteed. The information, analyses and opinions shall not be taken as representations for which Canada Mortgage and Housing Corporation or any of its employees shall incur responsibility.
