

RENTAL MARKET REPORT

Ottawa-GATINEAU CMA (Ontario)

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: Fall 2013

Highlights

- Ottawa's apartment vacancy rate increased to 2.9 per cent in 2013 from 2.5 per cent a year earlier.
- The average fixed¹ sample rent for two bedroom apartments increased by 2.0 per cent in 2013, just slightly above inflation.
- The rise in condominium rental supply absorbed some of the demand for rental accommodations and pushed the vacancy rate of traditional units up.

¹ Fixed-sample refers to a sample common to both the October 2012 and October 2013 surveys.

Market Overview

The rental market survey conducted in October 2013 by Canada Mortgage and Housing Corporation (CMHC) revealed that the average vacancy rate for the Ottawa Census Metropolitan Area (CMA) was 2.9 per cent, up from 2.5 per cent last year. Ottawa remained at the same position as last year relative to other CMAs, at seventh lowest vacancy rate point, higher than the Ontario average of 2.6 per cent.

Various supply and demand factors played a role in pushing the vacancy rate upward this October. Although continued inflows of immigrants into the capital supported the rental market, demand for rental accommodations decreased this year steered by softer employment conditions in the Ottawa region. Noteworthy is that while immigration is projected to be somewhat stronger

Figure 2

than last year, it will remain below previous peaks.

On the supply side, although few purpose-built rental units were completed and added to the rental market stock since October 2012,

the percentage of condominium units offered for rental purposes rose. These additional rental condos absorbed some of the demand coming from robust net migration in the CMA. Ultimately, supply forces outweighed demand and led to a slight increase in the vacancy rate from last year.

Demand Factors

Employment conditions contributed to a softening vacancy rate

The rise in the availability² rate from 4.6 per cent last year to 5.1 per cent this year signalled the movement of some households away from rental accommodations. Given the prospects of higher mortgage rates into 2014, some first-time buyers, generally within the 25-44 age cohort, jumped into the homeownership market supported by improving employment conditions. Given that households in

Figure 3

² A rental unit is considered available if the existing tenant has given, or has received, notice to move, and a new tenant has not signed a lease; or the unit is vacant.

Figure 4

this age group represent over one-third of all households in the CMA, the decision of some of them to move into homeownership pressured the vacancy rate up.

In addition, the weaker employment performance of the 15-24 age group further pressured the vacancy rate up as their demand for rental units eased. While this younger age cohort

forms households at a low rate, they comprise 11 per cent of total renters in the Ottawa CMA. According to latest Census from Statistics Canada, over half of young adults 20-24 were living at their parental home, further contributing to the increase in the vacancy rate.

Migration remains supportive of the rental market

Continued inflows of immigrants into the capital supported rental demand this year and helped to ease some of the upward pressure on the vacancy rate. Research³ shows that immigrants are more likely to rent in the first four years than move into homeownership. Recent Census data showed that a greater proportion of employed immigrants in the CMA hold post-secondary degrees.

In addition, the latest Statistics Canada Census revealed that close to half of all immigrants in the CMA come from South Asia, China and Southeast Asia and earn incomes either matching or very close to the Canadian-born average income supporting demand for higher-end condos in addition to demand for the traditional purpose built rental apartments. However, while net migration is projected to be higher than last year, the increase is not projected to be substantial and levels will remain below peak levels. Net migration into the capital is expected to reach 8,500 in 2013, a gain of 700 more people over 2012.

Supply Factors

Larger share of rental condominiums

The number of condominium apartments offered as rental accommodations increased by 23 per cent to 6,680 or 1,254 units more than the previous year. Although there was demand for these rental condo-apartments, given this high increase in units in the market, their vacancy rate inched up to 3.6 per cent this year from 3.2 per cent last year.

The availability of these additional condo units drew some demand away from traditional purpose built units. For example, the vacancy rate for rental condos in the inner suburbs diverged from the rising vacancy trend and went down to 3.6 per cent compared to 4.3 per cent last year, while the vacancy rate for purpose-built units in the inner suburbs went up from 2.4 to 2.9 per cent. This signals that additional condo-rental dwellings gave renters more options to choose from when deciding to rent, thereby pressuring the vacancy rate of the purpose-built units upward.

In general, the average rent of a 2-bedroom condominium unit was over 25 per cent higher than the same bedroom count purpose-built rental apartments and rental townhomes. However, demand for newer units in the purposed-built universe behaved differently. The vacancy rate for more expensive 2-bedroom purpose-built rental units constructed after 2000 declined from 3.5 per cent to 1.3 per cent signalling growth in high-end demand. Noteworthy is that the average rent for such purpose-built newer units was 6 per cent higher than the average rent for a same

bedroom count condo unit.

Some of the demand for condo rental might be coming from the higher income population segments in Ottawa, given the substantial difference in rents between a purpose-built dwelling and a condo rental apartment. The average after-tax household (two or more person households) income reached \$93,685 in Ottawa according to the latest Census remaining well above other major Canadian cities.

Townhomes rentals also a competitor

The vacancy rate for townhomes rented out declined to 3.7 per cent from 4.4 per cent in October 2012, indicating an increase in demand for such rental dwellings. Supporting demand for rental townhomes is that 2-bedroom units were renting at an average rent of \$1,130, almost on par with the going rate for a 2-bedroom traditional apartment unit while offering more space. According to the latest Statistics Canada Census, the average number of persons per census family in the Ottawa CMA is 3.0. Given this family size, some households preferred to rent more spacious accommodations. Consequently, townhomes absorbed some of the increased demand away from the purpose-built apartment units pressuring the latter's vacancy rate up.

Ottawa's rent rises below guideline

The 2-bedroom fixed sample rent rose 2.0 per cent at the same pace of growth as seen in 2012, but remained below the Rent Guideline increase of 2.5 per cent for 2013 in Ontario.

Apartment Vacancy Rates (%) by Major Centres		
	Oct. 2012	Oct. 2013
Abbotsford	4.2	3.2
Barrie	2.0	3.0

Windsor	7.3	5.9
Winnipeg	1.7	2.5
Total	2.6	2.7

Landlords having experienced higher vacancy rates, compared to the previous fall, raised rents at a slower rate in order to attract tenants.

The largest fixed sample rent increase was observed among bachelor units, especially among those located in New Edinburgh/Manor Park/Overbrook rising 5.2 per cent as such units in the area remained highly in

demand. Notably, their vacancy rate declined from 1.7 per cent last year to one of tightest vacancies in Ottawa at 0.8 per cent. Only bachelor units in the Glebe/Old Ottawa South, Alta Vista, Carlington-Iris had a lower

vacancy rate ranging from 0.5-0.6 per cent as rents remained below \$780.

On the other hand, three-bedroom apartments in Hunt Club/South Keys saw no rent increase from last year

as such units in the area had the highest vacancy rate at 6.1 per cent well above the Ottawa average for this bedroom type at 4.1 prompting landlords to keep rents at last year's level to attract tenants.

An Explanation of CMHC's Primary and Secondary Rental Market Surveys

CMHC's Rental Market Survey and Secondary Rental Market Survey only include privately initiated structures.

The primary rental market encompasses units in structures with three or more units, composed of self-contained units where the primary purpose of the structure is to house rental tenants. CMHC's Rental Market Survey (RMS) surveys the primary rental market in all centres with a population of 10,000 or more.

The secondary rental market represents self-contained units, such as condominiums and other rental homes not surveyed in CMHC's RMS. There are two types of Secondary Rental Market Surveys: of rented Condominiums and of rented structures with less than three self contained units. The secondary surveys are conducted jointly or individually for selected centres across Canada.

RMS ZONE DESCRIPTIONS - OTTAWA-GATINEAU CMA (ONTARIO PORTION)	
Zone 1	Downtown - Bounded by Queensway (south), Bronson (west), Ottawa River (north), Rideau Canal (east).
Zone 2	Sandy Hill/Lowertown - Includes Sandy Hill and Lowertown.
Zone 3	Glebe/Old Ottawa South -Includes the Glebe and Old Ottawa South.
Zone 4	Alta Vista - Includes Alta Vista
Zone 5	Carlington/Iris - Includes the area south of Carling Ave., west of Bronson and the Rideau River and north of Beatrice (Carlington and Iris).
Zone 6	Chinatown/Hintonburg/Westboro North - Includes Chinatown, Hintonburg and Westboro north of Richmond Rd.
Zone 7	New Edinburgh/Manor Park/Overbrook - Includes New Edinburgh, Manor Park and Overbrook.
Zone 8	Westboro South/Hampton Park/Britannia - Includes Westboro South, Hampton Park and Britannia.
Zone 9	Hunt Club/South Keys - Includes Hunt Club and South Keys
Zones 1-9	Former City of Ottawa
Zone 10	Vanier - Includes Vanier.
Zone 11	Gloucester North/Orleans - Includes the former municipality of Gloucester.
Zone 12	Eastern Ottawa Surrounding Areas - Includes the former municipalities of Cumberland, Clarence-Rockland, Russell and Osgoode.
Zones 11-12	Gloucester and Eastern Areas
Zone 13	Nepean - Includes the former municipality of Nepean.
Zone 14	Western Ottawa Surrounding Areas - Includes the former municipalities of Kanata, West Carleton, Goulbourn and Rideau.
Zones 13-14	Nepean and Western Areas
Zones 1-14	Ottawa-Gatineau CMA (Ontario portion)

CONDOMINIUM SUB AREA DESCRIPTIONS - OTTAWA-GATINEAU CMA (ONTARIO PORTION)	
Sub Area 1	Downtown includes RMS Zone 1 (Downtown); Zone 2 (Sandy Hill/Lowertown); and Zone 3 (Glebe/Old Ottawa South).
Sub Area 2	Inner Suburbs includes RMS Zone 4 (Alta Vista); Zone 6 (Chinatown/Hintonburg/Westboro North); Zone 7 (New Edinburgh/Manor Park/Overbrook); Zone 8 (Westboro South/Hampton Park/Britannia); and Zone 10 (Vanier).
Sub Area 3	Outer Suburbs includes RMS Zone 5 (Carlington/Iris); Zone 9 (Hunt Club/South Keys); Zone 11 (Gloucester North/Orleans); Zone 12 (Eastern Ottawa Surrounding Areas); Zone 13 (Nepean); Zone 14 (Western Ottawa Surrounding Areas).
Sub Areas 1-3	Ottawa-Gatineau CMA (Ontario portion)

NOTE: Refer to RMS Zone Descriptions page for detailed zone descriptions.

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b- Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

- No units exist in the universe for this category n/a: Not applicable

¹The Percentage Change of Average Rent is a measure of the market movement, and is based on those structures that were common to the survey sample for both years.

The following letter codes are used to indicate the reliability of the estimates:

a - Excellent, b- Very good, c - Good, d - Fair (Use with Caution)

** Data suppressed to protect confidentiality or data not statistically reliable.

++ Change in rent is not statistically significant. This means that the change in rent is not statistically different than zero (0).

- No units exist in the universe for this category n/a: Not applicable

TECHNICAL NOTE:

Difference between Percentage Change of Average Rents (Existing and New Structures) AND Percentage Change of Average Rents from Fixed Sample (Existing Structures Only):

Percentage Change of Average Rents (New and Existing Structures): The increase/decrease obtained from the calculation of percentage change of average rents between two years (example: \$500 in the previous year vs. \$550 in current survey represents an increase of 10 percent) is impacted by changes in the composition of the rental universe (e.g. the inclusion of newly built luxury rental buildings in the survey, rental units renovated/upgraded or changing tenants could put upward pressure on average rents in comparison to the previous year) as well as by the rent level movement (e.g. increase/decrease in the level of rents that landlords charge their tenants).

Percentage Change of Average Rents from Fixed Sample (Existing Structures Only): This is a measure that estimates the rent level movement. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. However, some composition effects still remain e.g. rental units renovated/upgraded or changing tenants because the survey does not collect data to such level of details.

METHODOLOGY FOR RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts the **Rental Market Survey (RMS)** every year in April and October to estimate the relative strengths in the rental market. The survey is conducted on a sample basis in all urban areas with populations of 10,000 and more. The survey targets only privately initiated structures with at least three rental units, which have been on the market for at least three months. The survey collects market rent, available and vacant unit data for all sampled structures.

The survey is conducted by a combination of telephone interviews and site visits, and information is obtained from the owner, manager, or building superintendent. The survey is conducted during the first two weeks of April/October, and the results reflect market conditions at that time.

CMHC is constantly reviewing the Universe of rental structures in the rental market Universe to ensure that it is as complete as possible. Every year, any newly completed rental structures with at least 3 rental units are added to the Universe. In addition to this, CMHC undertakes comprehensive reviews by comparing the Universe listing to other sources of data to ensure that the list of structures is as complete as possible.

CMHC's Rental Market Survey provides a snapshot of vacancy and availability rates, and average rents in both new and existing structures. There also exists a measure for the change in rent that is calculated based on existing structures only. The estimate is based on structures that were common to the survey sample for both the previous year and the current Rental Market Surveys. The change in rent in existing structures is an estimate of the change in rent that the landlords charge and removes compositional effects on the rent level movement due to new buildings, conversions, and survey sample rotation. The estimate of per cent change in rent is available in all Canada and Provincial Highlights publications, and also in the CMA reports (fall survey only). The rent levels in new and existing structures are also published. While the per cent change in rents in existing structures published in the reports are statistically significant, changes in rents that one might calculate based on rent levels in new and existing structures may or may not be statistically significant.

METHODOLOGY FOR SECONDARY RENTAL MARKET SURVEY

Canada Mortgage and Housing Corporation (CMHC) conducts a survey of the **Secondary Rental Market (SRMS)** in September and October to estimate the relative strengths in the secondary rental market which is defined as those dwellings not covered by the regular RMS – rented single-detached homes, semi-detached (double) homes, rented freehold row/townhomes, rented duplex apartments (i.e., one-above-other), rented accessory apartments (separate dwelling units that are located within the structure of another dwelling type), rented condominiums (can be any dwelling type but are primarily apartments), and one or two apartments which are part of a commercial or other type of structure.

The SRMS has three components which are conducted in selected CMAs:

- A Household Rent Survey of all households to collect information about rents.
- A Condominium Apartment Rent Survey of households living in condominium apartments to collect information about rents.
- A Condominium Apartment Vacancy Survey of condominium apartment owners to collect vacancy information.

All three surveys are conducted by telephone interviews. For the condominium apartment vacancy survey, information is obtained from the owner, manager, or building superintendent and can be supplemented by site visits if no telephone contact is made. For the other two surveys, information is collected from an adult living in the household. All surveys are conducted in September and October, and the results reflect market conditions at that time.

CMHC publishes the number of units rented and vacancy rates for the condominium vacancy survey. For the condominium rent and household rent surveys, the average rent is published. A letter code representing the statistical reliability (i.e., the coefficient of variation (CV)) for each estimate is provided to indicate the data reliability. Rented condominium apartments were surveyed in the following CMAs: Vancouver, Victoria, Calgary, Edmonton, Regina, Saskatoon, Winnipeg, Toronto, Ottawa, Montréal and Québec (NOTE: Condo rent data was not collected for Regina and Saskatoon). Other secondary rental market units were surveyed in Abbotsford, Barrie, Calgary, Edmonton, Halifax, Montreal, Ottawa, Quebec, St. John's, Toronto, Winnipeg, Regina, Saskatoon, Kelowna, Vancouver and Victoria.

Every year CMHC reviews the method of estimation for Household Rent Survey, which may result in some changes to previously published estimates. All statistics in this report are reflective of the new method of estimation.

DEFINITIONS

Availability: A rental unit is considered available if the existing tenant has given, or has received, notice to move, and a new tenant has not signed a lease; or the unit is vacant (see definition of vacancy below).

Rent: The rent refers to the actual amount tenants pay for their unit. No adjustments are made for the inclusion or exclusion of amenities and services such as heat, hydro, parking, and hot water. For available and vacant units, the rent is the amount the owner is asking for the unit.

It should be noted that the average rents reported in this publication provide a sound indication of the amounts paid by unit size and geographical sector. Utilities such as heating, electricity and hot water may or may not be included in the rent.

Rental Apartment Structure: Any building containing three or more rental units, of which at least one unit is not ground oriented. Owner-occupied units are not included in the rental building unit count.

Rental Row (Townhouse) Structure: Any building containing three or more rental units, all of which are ground oriented with vertical divisions. Owner-occupied units are not included in the rental building unit count. These row units in some centres are commonly referred to as townhouses.

Vacancy: A unit is considered vacant if, at the time of the survey, it is physically unoccupied and available for immediate rental.

Definitions of Census Areas referred to in this publication are as follows:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

Data presented is based on Statistics Canada's 2011 Census area definitions.

Acknowledgement

The Rental Market Survey and the Secondary Rental Market Survey could not have been conducted without the cooperation of the rental property owners, managers, building superintendents and household members throughout Canada. CMHC acknowledges their hard work and assistance in providing timely and accurate information. As a result of their contribution, CMHC is able to provide information that benefits the entire housing industry.

Rental Affordability Indicators

CMHC no longer reports on its rental affordability indicators (i.e. average rent compared to average renter income) given significant variability of underlying renter income data.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
